

**Registration for the ScanStar Student competition is now open**

The Nordic packaging competition ScanStar has been organized annually since 1969. In 2021 students in the Nordic countries were able to participate in their own joint Nordic packaging competition, ScanStar Student for the first time. This year the student competition is organized in connection with the original ScanStar by Emballasjeforeningen (Norwegian Packaging Association).

ScanStar Student seeks new innovations, ideas and packaging solutions designed during the ongoing academic year. The whole competition is organized virtually, and the entries do not need to be in physical form. The rules, registration form and detailed information about the registration can be found on the competition website: <https://scanstar.org/scanstar-student/>

Registration for the ScanStar Student is open until the 1<sup>st</sup> of June and the Jury will name the winners in Fall. The awarded packaging designs and ideas have access to enter the WorldStar Student competition which is held by the World Packaging Organisation WPO at the end of the year.
